INTERIOR DESIGNING

There is a nationwide wave of new construction of residential, commercial and industrial building. With all these infrastructural developments we need professionals to plan these buildings.

Professionals like Architects, Interior Designers, Landscapists, etc. are in vogue nowadays. YMCA has meticulously thought and planned the course and modules for aspirant Interior Designers.

We not only brush their designing skills but also attune them with architectural codes, graphical communication, space planning detailing, etc.

Teaching methodologies such as PPT's case studies, reports, sheets, mood boards, etc. are improving skills. They bring holistic development in a student. Since it's a practically applied course, our students are exposed to industrial and site visits, market surveys, for latest and updated awareness.

With increasing demand for well-defined spaces, which reflect a better lifestyle, and decreasing living space, we need to plan and use them meticulously.

In Short Term Foundational Course for ID, whether he /she is a professional or not, we equip students to explore spaces both functionally and aesthetically well. In this short duration, they would be made aware of rules of space planning in coordination with your existing or new furnishing and furniture.
